**Interim Financial Information**

**As at June 30, 2020**

## **Independent auditor's review report on quarterly information**

To the Board of Directors, Shareholders and Officers  
**Plascar Participações Industriais S.A.**  
Jundiaí - SP

### **Introduction**

We have reviewed the accompanying individual and consolidated interim financial information contained in the Quarterly Information Form (ITR) of Plascar Participações Industriais S.A. (the "Company"), for the quarter ended June 30, 2020, comprising the statement of financial position as of June 30, 2020 and the related statements of profit or loss and comprehensive income for the three and six-month periods then ended, and the statements of changes in equity and of cash flows for the six-month period then ended, including the explanatory notes.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with Accounting Pronouncement NBC TG 21 and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the fair presentation of this information in conformity with the rules issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

### **Scope of review**

We conducted our review in accordance with Brazilian and International Standards on Review Engagements (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion on the individual and consolidated interim financial information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the quarterly information referred to above are not prepared, in all material respects, in accordance with NBC TG 21 and IAS 34 applicable to the preparation of Quarterly Information Form (ITR), and presented consistently with the rules issued by the Brazilian Securities and Exchange Commission (CVM).

## **Emphasis of matter**

### ***Uncertainty about the Company's ability to continue as a going concern***

We draw attention to Note 1 to the individual and consolidated interim financial information which describes that the Company through its subsidiary has recorded recurring losses in its operations and has presented accumulated losses in equity in the amount of R\$ 1,068,076 thousand (R\$ 1,004,063 thousand on December 31, 2019), in individual and consolidated and excess current liabilities over current assets at the end of the six-month period ended June 30, 2020, in the amount of R\$ 125,580 thousand (R\$ 178,940 thousand on December 31, 2019) in the consolidated. As presented in Note 1, these events or conditions, together with other matters described in Note 1, indicate the existence of material uncertainty that may raise significant doubts as to the Company's ability to continue operating. Our conclusion does not contain a modification related to this matter.

## **Other matters**

### ***Statements of value added***

The abovementioned quarterly information includes the individual and consolidated statement of value added (SVA) for the six-month period ended June 30, 2020, prepared under Company's Management responsibility and presented as supplementary information by IAS 34. These statements have been subject to review procedures performed together with the review of the quarterly information with the objective to conclude whether they are reconciled to the interim financial information and the accounting records, as applicable, and if its format and content are in accordance with the criteria set forth by NBC TG 09 – Statement of Value Added. Based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the overall individual and consolidated interim financial information.

### Performance Commentary

The non-financial information included in the report, as well as the derived percentages and EBITDA information, have not been reviewed by our independent auditors.

Amounts expressed in thousands of Reais, except where otherwise indicated.

### Gross Income

As a result of the unprecedented crisis that also affected the automotive sector, in the second quarter of 2020 Plascar's gross margin was negative by 45.3% against a positive 2.6% in 2019.

According to ANFAVEA data, in the second quarter of 2020, vehicle production in Brazil showed a substantial drop of 81.5% compared to the same period in 2019.

FONTE: ANFÁVEA – BRASIL						
	2º Q/19	2º Q/20	VAR. %	1º H/19	1º H/20	VAR. %
VEHICLE PRODUCTION	776	144	-81.5%	1,474	730	-50.5%
VEHICLE SALES	701	251	-64.2%	1,308	809	-38.2%

### Anfavea forecasts production 45% lower this year

After accounting a significant drop of 50.5% in volumes produced in the first half of the year (729.5 thousand units) compared to the same period in 2019, the manufacturers' association, Anfavea, released its first production projection remade after the arrival of the coronavirus pandemic to Brazil. The entity expects a 45% retraction in the total of vehicles assembled in 2020, which represents 1.63 million, the lowest number registered since 2002.

In order to achieve the reduced number projected by Anfavea, the industry will have to manufacture around 150 thousand units / month from July to December, another value that has not been seen for years, as low.

After more than two months of stoppage, the sector recorded an increase in production in June, with 98,700 units assembled and an increase of 129.1% in relation to May. This growth was already expected, as noted by Luiz Carlos Moraes, president of Anfavea, as more automakers started producing again last month, continuing the movement started in May. Among members of the entity, only Honda has not yet resumed its operations in Sumaré and Itirapina (SP), which will occur on the 13th.

However, compared to June 2019 (when factories set up 233 thousand units), the reduction this year was 57.7%. In the first semester aggregate, the loss was practically an entire quarter, as only about 750 thousand fewer vehicles were produced compared to last year.

Management's Explanatory Notes to Quarterly Information - ITR, Individual and Consolidated, for the quarter ended June 30, 2020 (In thousands of Reais, except when otherwise indicated)

The light vehicle segment was the one that showed the greatest evolution in the total units produced in June 2020, with an increase of 142.6% in relation to May 2020, but, in compensation, it was also the one that exhibited the biggest decrease in the semiannual comparison, with a negative variation of 51.2% compared to the result obtained in the first six months of last year. There were 685,799 automobiles and SUVs manufactured this year, up from 1.4 million in 2019.

### Net income

This significant drop in market volumes led to a negative cash generation (EBITDA) of R\$ 17,268 (41.4%) in the 2nd quarter, and R\$ 14,637 (11%) for the aggregate in the first half of 2020, as shown in the table below:

### Relationship with External Auditors

In compliance with CVM Instruction No. 381, we inform that the three-month period ended June 30, 2020, the Company did not contract, with its auditors, a service not related to external auditing.

The Company's policy and its subsidiary in the contracting of services not related to external auditing with independent auditors is based on the principles that preserve the independence of the independent auditor, which are: auditor should not audit his own work; the auditor should not perform management function in his client and the auditor should not advocate for his client

### 1 Operational Context

Plascar Participações Industriais SA ("Plascar SA" or "Company"), headquartered in the city of Jundiaí (Since February 11, 2019 - previously headquartered in the city of Campinas), in the State of São Paulo, is a public limited company traded on the BM & FBOVSPA (PLAS3). The Company's activity is represented by its interest in the subsidiary Plascar Indústria de Componentes Plásticos Ltda. ("Plascar Ltda."), which operates in the automotive sector and is engaged in the industrialization and sale of parts and parts related to the internal and external finishing of vehicles.

Plascar Ltda. has industrial plants located in the cities of Jundiaí/SP, Varginha/MG and Betim/MG.

The plants operate mainly in the automotive sector, focusing on serving vehicle manufacturers, providing bumpers, instrument panels, air diffusers, cup holders, door sides, door packages, among other components. Plascar also operates in the industrialization of non-automotive products, such as injection and assembly of supermarket carts, multipurpose boxes, pallets and ecological furniture, an activity that represents less than 10% of the total assets, net revenue and net income consolidated in the Company.

Following the completion of the financial restructuring of the Company and its subsidiary on January 31, 2019, the controlling interest of Plascar S.A. became Pádua IV Participações S.A., with a 59.99% stake in its capital, which is also composed of Permali do Brasil Indústria e Comércio Ltda., with 18.44%, by Postalís Instituto de Seguridade dos Correios e Telégrafos, with 7.12%, and by other individual shareholders who have, together, 14.45%.

The issuance of these individual and consolidated Quarterly Information – ITRs was authorized by the Board of Directors on August 13, 2020.

### Financial Situation

As of June 30, 2020 the Company has excess current liabilities over current assets in the amount of R\$ 125,580 (R\$ 178,940 on December 31, 2019) in the consolidated and negative equity in the consolidated and in the parent company the amount of R\$ 136,260 887 (R\$ 72,203 on December 31, 2019).

Additionally, the Company posted losses in the current and comparative period, as well as maintaining an accumulated loss of R\$ 1,068,076, in the individual and consolidated period (R\$ 1,004,063 as of December 31, 2019).

Financial expenses totaled R\$ 26,565 in the first semester of 2020 (R\$ 61,582 on the first semester of 2019). A administração está tomando medidas para reduzir o impacto destas despesas no

resultado da Companhia, principalmente através da gestão e 'repactuação de seus passivos fiscais e bancários.

According to official ANFAVEA data published in January 2020, vehicle production in 2020 pointed to an increase of 7.3%, but with the crisis that began in March 2020 due to the PANDEMIC-COVID-19, the production estimate is pointing to a 45% drop.

The drop-in vehicle production of 81,5% in the second trimester is mainly due to the shutdown of automakers from the third week of March 2020 due to the pandemic (COVID-19). The Company's net revenue, in turn, in the second trimester of 2020, dropped by 59,5% when compared to the same period a year earlier.

The Company continues to adopt measures to increase revenue stemming from new projects and reduce its internal operating costs and improve margin, also promoting constant price negotiations with customers to pass on cost increases (labor, raw material, etc.), following the Company's restructuring process, as well as facing the crisis that began in March 2020 due to the COVID-19 pandemic.

The Company's Management is in the process of reviewing the projections, considering new projects and oscillation of volumes in the current scenario (COVID-19).

### Impacts of COVID-19 (Coronavirus) on the Company's business

On March 11, 2020, the World Health Organization (WHO) declared the Coronavirus COVID-19 outbreak a pandemic on a global scale. The outbreak triggered significant decisions by governments and private sector entities, which added to the potential impact of the outbreak, increased the degree of uncertainty for economic agents and could generate impacts on financial statements. The world's main economies and major economic blocs have been studying packages of significant economic stimulus to overcome the potential economic recession that these measures to mitigate the spread of COVID -19 can provoke.

In Brazil, the Executive and Legislative Branches of the Union published several normative acts to prevent and contain the pandemic, as well as mitigate the respective impacts on the economy, especially Legislative Decree No. 6, published on March 20, 2020, which declares the state of public calamity. State and municipal governments have also published several normative acts seeking to restrict the free movement of people and commercial and service activities, in addition to enabling emergency investments in the health area.

Production suspensions have reached almost the entire sector in the country, with 123,000 workers stopped at 63 factories located in 40 cities in 10 states. Several automakers began outages in March even because of increased shortages. According to the president of Anfavea, about 7% of the market drop occurred exclusively because of the crisis caused by Coronavirus in Brazil. The vehicle's productions drop on the second semester of 2020 was 81% compared with the same period of 2019

Management has consistently evaluated the impact of the outbreak on the operations and equity and financial position of the Company and its subsidiary, with the objective of implementing appropriate measures to mitigate the impacts on operations. The Administration immediately activated its Crisis Committee to ensure the safety of its employees, service providers and serviced customers. Until the date of authorization for issuing this interim accounting information, the following measures have been taken and the main issues that are under constant monitoring are listed below:

- Implementation of a Crisis Management committee;
- Restrictions regarding the circulation and crowding of people on its premises, as a way to prevent the spread of the virus;
- Suspension of travel, on-site training and participation in events for all employees;
- Orientation of the home office regime for employees whose function allows this type of work and isolation of all employees classified as at greatest risk (over 60 years of age and with chronic illnesses, as advised by public entities);
- Intensification in internal communications of preventive measures, provision of 24-hour medical assistance channels to support employees and family members and provision of internal communication channels to employees, focused on the care related to the pandemic; and
- Optimization of the use of technology to ensure virtual service to its customers, impacting as little as possible their administrative and operational activities.

Visando reduzir os impactos financeiros a Administração ainda adotou as seguintes medidas:

- Anticipation of collective vacations for its employees and on April 1, 2020, in line with the union responsible for the category, implemented the workload reduced by 50% for all employees;
- Renegotiation of terms of certain liabilities with banks, suppliers and other accounts payable;
- From the end of February to the beginning of March 2020, the Company implemented even greater control of its inventory management to keep them at the minimum necessary level;
- Management carried out benchmarking with other auto parts manufacturers and also with automakers to exchange information and measures for application in the Company.

The Company's operations for the semester ended June 30, 2020 were significantly impacted by the pandemic, contemplating a total drop in revenue of 59,5% when compared with the same period on 2019.

Despite the total shutdown of the automakers, which occurred in different periods between the months of March and June 2020, the three plants continued to function. However, the pace of work was very slow, focusing on specific projects and preventive maintenance activities. The costs related to the idle capacity of the plants in this quarter were measured by Management and recorded directly in the income for the period, in accordance with CVM guidance 24/92.

Management constantly assesses the impact that the outbreak may have on operations and on the Company's equity and financial position, with the objective of implementing appropriate measures to mitigate the impacts of the outbreak on operations and its financial information.

Management is also monitoring the effects of the crisis for the coming months, with the slow and gradual resumption of the main automakers starting in May 2020. Cash protection measures are being implemented, including raising funds to maintain floating capital and measures aimed at preserving the employment of its employees, as well as optimizing the use of resources in general.

### Corporate and Financial Restructuring

At the Extraordinary General Meeting, held on December 13, 2018, the final plan for the restructuring of the Company's debt was approved by unanimously of the votes of the shareholders present, which, in general terms, involves the assignment of approximately 90% of Plascar's

existing debt by the Company's main creditors to the current parent company "Padua IV Participações S.A.".

On January 31, 2019, in accordance with the Notice to Shareholders and Material Fact disclosed to the market, the Company's capital was increased with payment made using credits held against Plascar Ltda., by private subscription, in the amount of R\$ 449,483, through the issue of 7,455,251 common shares at the unit issue price of R\$ 60.29 per common share. After the Capital Increase was carried out, the Company's capital, previously in the amount of R\$ 481,972, divided into 4,970,167 common shares, became R\$ 931,455, divided into 12,425,418 common shares.

With the conclusion of the Company's financial restructuring on January 31, 2019, the Company's equity and current liabilities were positively impacted by R\$ 449,483, due to the capital increase.

Management continues to negotiate liabilities with several creditors, with the objective of adjusting them to the Company's cash generation capacity. Throughout 2019 and early 2020, certain liabilities were renegotiated, which are now reported in non-current liabilities.

The Corporate Structure is shown below, including the Company's new controlling shareholder - Pádua IV Participações S.A., after completing the Company's restructuring plan and subscribing for capital.

### 2. Summary of the main accounting policies and presentation of the trimestral information - ITR

The Company presents the individual and consolidated Quarterly Information in accordance with CPC 21 (R1) - Interim Statement, issued by CPC - Comitê de Pronunciamentos Contábeis and IAS 34 - Intermediate Financial Report, issued by IASB - International Accounting Standards Board, applicable to preparation of the Quarterly Information - ITR, and presented in a manner consistent with the rules established by CVM - Comissão de Valores Mobiliários.

In accordance with CVM/SNC/SEP Circular Letter No. 03/2011, the Company opted to present the explanatory notes in this quarterly information in a summary form in cases of redundancy in relation to that presented in the annual statements. In these cases, the location of the full explanatory note is indicated in the annual statement, to avoid prejudice to the understanding of the Company's financial position and performance during the interim period. Accordingly, this quarterly information should be read in conjunction with the annual financial statements for the year ended December 31, 2019.

The preparation basis and accounting policies are the same as those used in the annual financial statements for the year 2019. Therefore, the corresponding information should be read in notes 2 to those statements.

The consolidated interim financial information includes the financial statements of Plascar Participações Industriais S.A and its subsidiary detailed below:

	Direct Participation	
	06/30/2020	12/31/2019
Plascar Indústria de Componentes Plásticos Ltda. (Plascar Ltda.)	100%	100%

### 3. Critical accounting estimates and judgments

Accounting estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events, considered reasonable under the circumstances.

Based on assumptions, the Company makes estimates regarding the future. By definition, the resulting accounting estimates will rarely be equal to the respective actual results. The estimates and assumptions that present a significant risk, with the probability of causing a relevant adjustment in the book values of assets and liabilities for the next fiscal year, are contemplated below:

#### (a) Income tax, social contribution and other taxes

The Company is subject to income tax in all countries in which it operates. Significant judgment is required to determine the provision for income taxes in these countries.

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes to Quarterly Information - ITR, Individual and Consolidated, for the quarter ended June 30, 2020 (In thousands of Reais, except when otherwise indicated)

---

In many operations, the final determination of the tax is uncertain. The Company also recognizes provisions due to situations in which it is probable that additional amounts of taxes will be due.

When the final result of these matters differs from the amounts initially estimated and recorded, these differences affect current and deferred tax assets and liabilities in the period in which the definitive amount is determined.

### (b) Impairment of non-financial assets

Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized when the asset's carrying amount exceeds its recoverable amount, which represents the higher of an asset's fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (Cash-Generating Units (CGUs) as shown in Note 12.

## 4. Financial risk management

### 4.1 Financial risk factors

The Company's activities expose it to several financial risks: market risk (including currency risk and fair value risk associated with interest rates), credit risk and liquidity risk. The Company's global risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company's treasury identifies, assesses and protects the Company against possible financial risks in cooperation with the Company's operating units.

### (a) Market risk

#### (i) Foreign exchange risk

The Company operates internationally and is exposed to foreign exchange risk arising from exposures of some currencies, basically in relation to the United States dollar. Foreign exchange risk arises from commercial operations, assets and liabilities.

As of June 30, 2020 and December 31, 2019, the Company presents assets and liabilities in foreign currency arising from import, export and loan transactions with related parties, in the amounts shown below:

	Consolidated	
	06/30/2020	12/31/2019
Accounts receivable from customers (Note 6)	8,059	6,067
Suppliers	(500)	(194)

Net exposure	<u>7,559</u>	<u>5,873</u>
--------------	--------------	--------------

As of June 30, 2020 and December 31, 2019, the Company did not have transactions with derivative financial instruments to manage exchange rate risk.

### (ii) Cash flow risk or fair value associated with interest rate

The Company has no significant assets in which interest accrues.

The Company's interest rate risk arises from loans and financing. Loans at variable rates expose the Company to cash flow interest rate risk. Fixed rate loans expose the Company to the fair value risk associated with the interest rate.

The table below shows the sensitivity to a possible change in interest rates, keeping all other variables constant, in the Company's profit before taxation (it is affected by the impact of loans payable subject to variable rates).

Financial liabilities	Impact on income for the period (1)		
	Scenario I Likely	Scenario II +25%	Scenario III +50%
CDI	2.15%	2.69%	3.23%
Loans and financing	(5,131)	(5,564)	(5,997)

- (1) Refers to the hypothetical scenario of interest to be incurred for the next 12 months or until the maturity date of the contracts, whichever is lower.

In the sensitivity analysis, the interest rate is based on the rates currently practiced in the market environment.

Sensitivity analyses were prepared based on the value of net debt and the fixed interest rate index against variable interest rates on the debt as of June 30, 2020.

### (b) Credit risk

Credit risk is managed corporately. Credit risk arises from credit exposures to customers of original equipment ("OEM") and replacement / concessionaires ("DSH"), including open accounts receivable and repo operations. For banks and other financial institutions, only securities from top tier entities are accepted. The individual risk limits are determined based on internal or external ratings according to the limits determined by the Board of Directors. The use of credit limits is monitored regularly.

The possibility that the Company and its subsidiary may incur losses due to financial problems with their OEM customers is reduced due to the profile of these customers (vehicle manufacturers and other companies operating worldwide). As of June 30, 2020, and December 31, 2019, the Company and its subsidiary do not have significant balances receivable from customers in the DSH category.

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes to Quarterly Information - ITR, Individual and Consolidated, for the quarter ended June 30, 2020 (In thousands of Reais, except when otherwise indicated)

No credit limit was exceeded during the year, and Management does not expect any loss due to default by these counterparties in excess of the amount already provisioned.

### (c) Liquidity risk

The cash flow forecast is made at the Company's operating entity and aggregated by the Finance department. This department monitors the continuous forecasts of the Company's liquidity requirements to ensure that it has enough cash to meet operational needs. This forecast considers the Company's debt financing plans, compliance with clauses, compliance with the internal goals of the balance sheet quotient and, if applicable, external or legal regulatory requirements - for example, currency restrictions.

The Treasury invests any excess cash in bank accounts with interest, time deposits, short-term deposits and bonds and securities, choosing instruments with appropriate maturities or enough liquidity to meet the above-mentioned forecasts. On the balance sheet date, the Company maintained short-term funds in the amount of R\$ 1,244, which are expected to promptly generate cash inflows to manage liquidity risk.

The following table analyzes the Company's financial liabilities, by maturity, corresponding to the period remaining between the balance sheet date and the contractual maturity date. The amounts disclosed in the table are the discounted cash flows contracted and represent the expected actual disbursement flows, disregarding any bank requirements for early maturities.

The Company's policy for provision for expected loss with doubtful accounts includes the balance overdue for more than 90 days. The balance overdue for more than 90 days not provisioned as of June 30, 2020, net of the expected loss for doubtful accounts, refers to the sale of tooling, for which management does not expect to record losses.

In addition, in line with CPC 48 (IFRS 9) Financial Instruments, the Company's policy also considers the expected credit losses for its receivables, these being the present value of the difference between the contractual cash flows due to the Company in accordance with the contract signed with the clients and the cash flows that the Company expects to receive.

#### (1) Credit Exclusion of ICMS from PIS/COFINS calculation base - Final transit accounting record

The Company informs that, in 2010, it issued a Writ of Mandamus in order to exclude ICMS from the PIS and COFINS calculation bases. In September 2017, the Company obtained a favorable decision at first instance and, in October 2019, it obtained a new favorable sentence in appeal (STF). In the same act, the process became final. In view of this, the Company initiated a procedure to collect amounts unduly paid as from 2005 and claim their respective reimbursement. The Company has reliably calculated and measured the respective amounts.

On August 19, 2019, the Company obtained a favorable sentence for using the ICMS highlighted in the invoices for calculating the credit.

In the fourth quarter of 2019, based on the opinion and report prepared by its advisors, the Company recorded the amount of R\$ 179,069 in the caption of taxes to be recovered in the balance sheet to offset against current taxes administered by the Brazilian Federal Revenue in future periods. The principal amount of the credits, net of lawyers' success fees, was recognized as other

operating income and the monetary restatement was recognized in the financial income item in the income statement for the year.

The approval and qualification of R\$ 123,396 related to part of the referred credit with the Federal Revenue of Brazil for future tax compensation, occurred on January 3, 2020, and the remaining amount of the credit in the amount of R\$ 55,673, will be subject to analysis by the Federal Revenue of Brazil for refund or future compensation of taxes previously paid in installments.

The Company offset up to June 30, 2020 the total amount of R\$ 32,430.

### 9 Income tax and social contribution

Deferred income tax and social contribution are calculated on income tax loss carryforwards, the negative social contribution base and the corresponding temporary differences between the calculation bases for tax on assets and liabilities and the carrying amounts of the financial statements. The rates of these taxes, currently defined for determining deferred taxes, are 25% for income tax and 9% for social contribution.

Deferred tax assets, when applicable, are recognized to the extent that it is probable that future taxable profit will be available to be used to offset temporary differences / tax losses, based on projections of future results prepared and based on internal assumptions and scenarios. future economic conditions that may therefore change.

(1) Refers to deferred taxes calculated on the cost attributed to fixed assets resulting from the accounting of its fair value in the initial adoption of CPC 27 (IAS 16).

(2) It refers to deferred taxes calculated on the depreciation difference of fixed assets generated after a review of the useful life – economic of the goods. Until December 31, 2010, the Company, as permitted by tax law, also considered for tax purposes the depreciation calculated based on the new useful and economic lives of the goods. As of September 2011, the Company began to use for tax purposes the depreciation calculated based on the useful life allowed by the tax legislation and, consequently, recognized the corresponding deferred tax effects.

The Company has balances of fiscal loss and negative social contribution base of R\$ 56,581 and R\$ 67,583, respectively (R\$ 56,142 and R\$ 67,144 as of December 31, 2019, respectively), the subsidiary Plascar Ltda. has balances of tax loss and negative social contribution base of R\$ 791,792 and R\$ 786,735, respectively (R\$ 729,876 and 724,820 as of December 31, 2019 , respectively) on which no deferred taxes were constituted assets in their entirety, as determined by CVM Instruction 371, since the Company has no expectation of generating future taxable profits.

### b) Balances and transactions

The Company conducts commercial transactions and loan transactions with its subsidiary and other related parties, in accordance with the criteria defined below:

The Company and its subsidiary enter into loan agreements with related parties, so that cash needs are met immediately, without the need for approval processes required by financial institutions. Such contracts are subject to the availability of funds and the non-commitment of the lender's cash flow. These loan agreements are entered at rates agreed between the parties.

Below are the main balances of assets and liabilities at June, 2020 and December 31, 2019, as well as the transactions that influenced the results of the periods:

The effects of the transactions on the result correspond to the monetary restatement and exchange variation recorded in the financial result.

The loan agreement between the Company (borrower) and Plascar Ltda. (lender) is not subject, exceptionally, to financial charges, as the Company is the direct holder of 100% of the share capital of Plascar Ltda. It is the only loan agreement in which the lender is a non-operating company and holds a direct interest in approximately 100% of the capital of the borrower, a circumstance that justified the non-occurrence of interest. This agreement was signed on May 31, 2000, to adjust the cash flow of Plascar Ltda, with an indefinite maturity.

The loan agreement between Permalí do Brasil Indústria e Comércio Ltda. (lender) and Plascar Ltda. (borrower) is subject to 0.8% monthly interest and matures indeterminate. This agreement was signed on March 31, 2009 to adjust the cash flow of Plascar Ltda.

The other information referring to this explanatory note has not undergone any significant changes in relation to that disclosed in Note 12 of the annual financial statements for the year ended December 31, 2019.

### 13) Right to Use Assets and Lease Liabilities

As of January 1, 2019, with the adoption of CPC 06 (R2) / IFRS16 - Leases, the Company started to record future rentals discounted to present value as Lease Liabilities. The initial impact on Assets and Liabilities was R\$ 53,065. The amount was calculated considering the total term of the contract. Management considered 9.5% as an incremental rate for discounting debt to Present Value (AVP), which is the same rate considered when renewing loans with banks. During the six-month period ended June 30, 2020, the Company recorded R\$ 11,375 as an amortization expense in the result (R\$ 9,422 on June 30, 2019).

#### a) Assumptions for recognition

The Company recognizes the Right to Use Assets and Liabilities for leases considering the following premises:

(i) Inclusion of contracts in the base at the beginning of their term, with their value of the right-of-use asset defined at this time.

(ii) Transactions with contracts signed for more than 12 months fall within the scope of the standard. The Company does not consider aspects of renewal in its methodology, given that the assets involved in its operation are not indispensable for the conduct of its business, and may be replaced at the end of the contract by new assets acquired or by other operations other than those agreed upon.

(iii) Contracts that involve the use of immaterial and low value assets are not considered.

(iv) Only transactions involving specific assets defined in the contract or for exclusive use over the period of the contract are considered.

(v) The methodology used to calculate the net present value of the contracts corresponds to the cash flow of the assumed installments discounted at the discount rate defined for the asset class.

(vi) The discount rate for the six-month period ended June 30, 2020 used was 9.5% per year for the operations of administrative properties and industrial warehouses. The rates were obtained by financing operations for assets of these classes.

The Company's leasing operations in effect on June 30, 2020 and December 31, 2019 do not have any restriction clauses that impose the maintenance of financial ratios, nor do they have variable payment clauses that should be considered or guarantee clauses. residual value and call options at the end of the contracts.

### 17 Commitments and provision for contingencies

#### a) Operating lease (Sale & Leaseback transaction)

During the year ended December 31, 2011, Plascar Ltda. carried out Sale & Leaseback transactions of the buildings and land of the industrial units of Varginha, Jundiá and Betim. The rental contracts of the properties are valid for a period of 10 years and may be renewed for an additional period of 10 years after express manifestation of Plascar Ltda., with no option to purchase the properties at the end of the contracts.

As of January 1, 2019, according to CPC 06 (R2) / IFRS 16, the Company began to record future rents discounted at present value as Rental Liabilities. The impact on fixed assets and liabilities was R\$ 53,065 (Note 13).

#### b) Renegotiation of rent debt

The Company concluded in January 2020 the renegotiation of its arrear's debt, the balance of which at December 31, 2019 was R\$ 137 million, recorded under the heading "other liabilities" and "Leases liabilities" in the current year.

With the conclusion of this negotiation, the updated debt was split, with a grace period of more than one year to start payments. The balance was transferred to the item Other Liabilities in the non-current in January 2020.

#### c) Lawsuits - Amounts involved and accounting provision criteria for probable loss cases

The Company is involved in several labor (and social security), civil and tax processes that are currently underway. The criterion adopted by the Company for classifying the risk of loss is estimated as "remote", "possible" and "probable", and "remote" indicates minimal risk of loss, "possible" indicates moderate risk of loss and "probable" indicates high risk of judicial loss, and it is up to the external legal advisors, with the help of the Company's legal department, to analyze in detail each judicial process, new or in progress, classifying them according to their best outcome estimates.

These risk classifications are evaluated monthly and may be changed whenever the understanding of the legal advisor indicates this need. In addition, all processes also receive monthly monetary update, according to the legal indexes adopted by the courts, in order to reflect the most accurately the current economic situation of each process.

For all cases in which the external and internal legal assessors present a risk of loss as "probable", a company authorized individually in sufficient quantity to cover the estimated value of that loss, which is calculated and authorized through judicial litigation (no case of judge) or assistant accounting assistant (case of the Company), based on the sentences of condemnatory sentence and/or other decisions originating from higher levels (appeal level) issued by the courts and why, without a doubt, that the Company is obliged to make the payment in the short term, due to the advanced stage of the process. In addition, the Company has a policy of providing for labor claims classified as possible for which it expects to make settlement agreements.

Considering the cases with "probable" risk of loss, the Company has a total provision set up as indicated below:

	Consolidated	
	06/30/2020	12/31/2019
Social security and labor provisions	7,677	7,395
	<u>7,677</u>	<u>7,395</u>

The change in the provision for legal claims with a "probable" risk of loss, in the six-month period ended June 30, 2020, is represented as follows:

	June 30, 2020			
	Initial Balance	Addition	Payments	Final Balance
Labor	7,395	2,394	(2,112)	7,677
	<u>7,395</u>	<u>2,394</u>	<u>(2,112)</u>	<u>7,677</u>

### d) Estimate of "possible" losses, not provisioned in the balance sheet

For the other legal actions of the Company, whose risk of loss is classified by the external and internal legal advisors as "possible" or "remote", there is no accounting provision. Despite this, the Company recognizes the importance of informing the amounts involved in these processes, as a way of giving enough knowledge and information to the market about all the actions to which the Company is a party. For new shares, the amount informed by the Company considers the amount given to the cause (initial amount). As the lawsuit progresses, legal advisors determine the amounts involved in each proceeding with greater discretion, valuing each one more precisely as to the amounts involved, as well as their effective risk of loss.

Considering the processes with "possible" risk of loss, the Company informs that the amounts

### e) Relevant contingent assets

Currently, Plascar Ltda. appears as an active party in two lawsuits considered relevant against FUNRURAL and ELETROBRÁS, whose amounts involved are R\$ 8,585 and R\$ 19,249, respectively.

- (i) The lawsuit against ELETROBRÁS, whose sentence was favorable to the Company, is at an advanced stage of the process, and the Company has already started the process of provisional execution of the sentence, requiring payment of the amount due. The case is currently awaiting a judicial decision regarding the beginning of the referred execution requested by the Company.
- (ii) The lawsuit against FUNRURAL was processed and judged on September 4, 2001, with Plascar being granted the net and certain right to receive the amount of R\$ 2,237. This amount, however, was questioned by the Company regarding its monetary restatement, which was not considered by the court. A definition of said update is still pending and, consequently, the correct amount to be paid in favor of the Company, whose estimate by the legal advisors indicates the amount of R\$ 8,585.

### (a) Capital

#### Capital increase and issue of shares

On January 31, 2019, according to the Notice to Shareholders and Material Fact disclosed to the market, the Company's capital was increased with the payment of credits held against Plascar Ltda., By private subscription, in the amount of R\$ 449,483, through the issue of 7,455,251 common shares at the unit issue price of R\$ 60.29 per common share. After effecting the Capital Increase, the Company's capital stock, previously in the amount of R\$ 481,972 and divided into 4,970,167 common shares, became R\$ 931,455, divided into 12,425,418 common shares.

The issue price of the shares was fixed, without unjustified dilution for the current shareholders of the Company, considering the methodologies allowed by article 170, paragraph 1, of the Brazilian Corporation Law, in view of the current financial situation of the Company, which has high indebtedness and negative equity.

Since the Brazilian Corporation Law does not establish a rigid formula for setting the issue price, this price was fixed in view of the criteria of article 170, paragraph 1, of the Brazilian Corporation Law, in respect of the Company's social interest. that the Company could carry out the restructuring as planned.

#### Subscription Bonus

The Company issued in favor and as an additional advantage to the subscribers of the Capital Increase shares, upon reaching Plascar Plásticos EBITDA targets in the years 2020, 2021 or 2022, 7,455,251 subscription bonus, in a single series and under the book-entry and nominative form, with 1 subscription bonus attributed to each share of the subscribed Capital Increase.

The granting to its holders, jointly, grants the right to subscribe shares of the Company representing 5% of the Company's capital after the issue of such shares. The subscription price for 1 share issued as a result of the exercise of the Subscription Bonus will be R\$ 0.01 "Exercise Price". The subscription of the shares resulting from the exercise of the Subscription Bonus is to be made in a particular way, in the act of exercising the Subscription Right, and the payment of the shares then subscribed must be made through the payment in cash of the Exercise Price, in currency national chain, upon the subscription of such shares.

### b) Other comprehensive income

#### Equity valuation adjustments

This heading also includes the impacts on the change in the parent company's stake in the subsidiary from 99.89% to 100% after the financial restructuring that took place on January 31, 2019.

### c) Compensation to shareholders

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes to Quarterly Information - ITR, Individual and Consolidated, for the quarter ended June 30, 2020 (In thousands of Reais, except when otherwise indicated)

According to the Company's Bylaws, shareholders are entitled to receive a minimum annual dividend of 25% of net income for the year, adjusted pursuant to articles 189 and 202 of Law No. 6,404/76.

### 20 Earnings per share

The basic calculation of profit or loss per share is made by dividing the net profit or loss for the year, attributed to holders of common shares of the parent company, by the weighted average number of common shares available during the year.

Diluted earnings or loss per share is calculated by dividing the net profit or loss attributable to holders of common shares of the parent company by the weighted average number of common shares available during the year, plus the weighted average number of common shares that would be issued on conversion of all potential common shares diluted in common shares.

The table below shows the result and share data used in the calculation of basic and diluted losses per share for the quarter and the six-month period ended June 30, 2020 and 2019 (in thousands, except per share amounts):

The Company and its subsidiary have complementary variable compensation plans that consider meeting the established goals:

- (i) Profit sharing plan (PPR): The Company remunerates its employees through profit sharing in accordance with the collective agreement established between the Company, the employees' commission and the union of the category, which establishes goals that are monthly measured and disclosed. This plan aims to stimulate development and productivity, providing opportunities for financial gains and conditions for effective participation in the Company's results.
- (ii) Additional profit-sharing bonus plan (short-term PPR): The Company also grants a bonus to the Company's managers and directors with a different salary. Profit sharing due to employees occupying these functions is based on performance (individual and the Company), according to pre-established goals.

### 26 Insurance

In the semester ended June 30, 2020, there were no changes in insurance coverage, value of policies and risks involved. Accordingly, there were no changes in relation to the disclosures in note no. 26 of the annual financial statements of December 31, 2019.

The risk assumptions adopted, given their nature, are not part of the scope of an audit of financial statements, consequently they were not examined by our independent auditors.
