## Human Resources

Despite the economic adversities in the country, the Company continues to invest in the professional development of its employees, with approximately 28.72 hours of teaching and training per employee (in the last 12 months), focused on SENAI learning, internships, supplementary training, in addition to training technical and operational development.

As of June 30, 2022, the Company had 2.011 employees (1,725 as of June 30, 2021).

## Relationship with External Auditors

In compliance with CVM Instruction No. 381, we inform that in the six-month period ended June 30, 2022, the Company did not contract with its auditors, a service not related to the external audit.

The policy of the Company and its subsidiary in contracting services not related to the external audit with the independent auditors is based on the principles that preserve the independence of the independent auditor, which are: auditors must not audit their own work; the auditor should not exercise a management role for his client and the auditor should not advocate for his client.

## Independent auditor's review report on quarterly information

To the Board of Directors, Shareholders and Officers

Plascar Participações Industriais S.A.

Jundiaí – SP

### Introduction

We have reviewed the individual and consolidated interim financial information of Plascar Participações Industriais SA ("Company"), contained in the Quarterly Information Form - ITR for the quarter ended June 30, 2022, which comprises the balance sheet on June 30, 2022, and the respective statements of income and comprehensive income for the three and six months periods ended on that date, and changes in shareholders' equity and cash flows for the six-month period ended on that date, including the explanatory notes.

The Company's management is responsible for preparing the individual and consolidated interim financial information in accordance with NBC TG 21 - Interim Statement and the international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation this information in a manner consistent with the rules issued by the Brazilian Securities and Exchange Commission ("CVM"), applicable to the preparation of the Quarterly Information - ITR. Our responsibility is to express a conclusion on this interim financial information based on our review.

### Review scope

We conducted our review in accordance with Brazilian and international standards for the review of interim financial information (NBC TR 2410 Review of Interim Information Performed by the Entity Auditor and ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, mainly of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The scope of a review is significantly less than that of an audit conducted in accordance with auditing standards and, consequently, has not allowed us to obtain assurance that we are aware of all significant matters that could be identified in an audit. Therefore, we do not express an audit opinion.

### Conclusion on the individual and consolidated interim information

Based on our review, we are not aware of any facts that would lead us to believe that the interim financial information, individual and consolidated, included in the quarterly information was not prepared, in all material respects, in accordance with NBC TG 21 and IAS 34 applicable to the preparation of Quarterly Information (ITR), and presented in a manner consistent with the rules issued by the Brazilian Securities and Exchange Commission.

## Emphasis of matter

### Uncertainty about the Company's ability to continue as a going concern

We call attention to Note 1 of the interim financial information, individual and consolidated, which describes that the Company through its subsidiary has recorded recurring losses in its operations and has presented accumulated losses in shareholders' equity in the amount of R\$ 1,280,067 thousand, in individual and consolidated and excess current liabilities over current assets at the end of the period ended June 30, 2022, in the amount of R\$ 319,529 thousand in the consolidated. As presented in Note 1, these events, or conditions, together with other matters described in Note 1, indicate the existence of significant uncertainty that may raise significant doubts as to the Company's ability to continue operating. Our conclusion does not contain a reservation related to the matter.

## Other matters

### Statements of value added

The quarterly information includes the individual and consolidated statements of added value (DVA) for the six-month period ended June 30, 2022, prepared under the responsibility of the Company's management, and presented as supplementary information for the purposes of IAS 34. These statements have been subject to review procedures performed in conjunction with the review of the quarterly information, to determine whether they are reconciled with the interim accounting information and accounting records, as applicable, and whether their form and content are in accordance with the criteria defined in NBC TG 09 Statement of Added Value. Based on our review, we are not aware of any fact that leads us to believe that these statements of added value were not prepared, in all material respects, in accordance with the criteria defined in this Standard and in a consistent manner in relation to the individual interim financial information. and consolidated figures taken together.

### 1. Operational context

Plascar Participações Industriais S.A. ("Plascar S.A." or "Company"), headquartered in the city of Jundiaí, State of São Paulo, is a publicly traded company, with its shares traded at BM&FBOVESPA (PLAS3). ("Plascar Ltda." or "Plascar"), which operates in the automotive sector and has as its operational activity the industrialization and commercialization of parts and pieces related to the internal and external finishing of automotive vehicles. Plascar Ltda. has industrial plants located in the cities of Jundiaí/SP, Varginha/MG, and Betim/MG.

On September 24, 2021, the Company informed the market about the installation of a new industrial unit in the city of Caçapava/SP. Start-up is scheduled for the third quarter of 2022 and, in principle, the new unit will supply assemblers installed in the Vale do Paraíba region.

The plants operate mainly in the automotive sector, with a focus on serving vehicle assemblers, supplying bumpers, instrument panels, air diffusers, cup holders, door sides, and package holders, among other components. Plascar also operates in the industrialization of non-automotive products, such as, for example, injection and assembly of supermarket carts, multipurpose boxes, pallets, and ecological furniture, an activity that represents less than 6% of the Company's total consolidated assets, net revenue, and net income.

After the completion of the financial restructuring of the Company and its subsidiary on January 31, 2019, the controlling interest in Plascar S.A. is now held by Pádua IV Participações S.A., with 59.99% of its capital, which is also composed of Permalí do Brasil Indústria e Comércio Ltda. with 18.44%, Postalís Instituto de Seguridade Social dos Correios e Telégrafos with 7.12%, and other individual shareholders that together hold 14.45%, Note 21.

The issue of these individual and consolidated Quarterly Financial Statements (ITRs) was authorized by the Board of Directors on August 5, 2022.

### Financial Condition

On June 30, 2022, the Company presents an excess of current liabilities over current assets in the amount of R\$ 319,529 (R\$ 257,498 on December 31, 2021) in the consolidated and negative shareholders' equity in the parent company and consolidated in the amount of R\$ 348,293 (R\$ 311,446 on December 31, 2021). Additionally, the Company presented a loss for the current and comparative periods and maintains an accumulated loss of R\$ 1,280,067 in the parent company and consolidated (R\$ 1,243,222 on December 31, 2021).

Financial expenses totaled R\$ 45,878 in the first half of 2022 (R\$ 30,339 in the first half of 2021). Management is taking measures to reduce the impact of these expenses on the Company's results, mainly through management, with efficiency improvement plans and renegotiation of its tax and banking liabilities.

Management is taking steps to renegotiate the totality of its tax liabilities with the Federal Revenue Service and PGFN, through the tax transaction program instituted by Law 14.375/2022, whose regulation ordinance was published on 08/01/2022. With the successful conclusion of this transaction, the Company will achieve an important reduction of late payment charges, in addition to the possibility of using part of its tax loss balance, as authorized by the Law, thus reducing its financial cost and need to generate cash to meet the obligations assumed in this negotiation. The expectation is to conclude this transaction still in the 3rd quarter of 2022.

In the 2nd quarter of 2022, there was an increase in the production of vehicles by 8%, when compared to the 2nd quarter of 2021, according to data from ANFAVEA. The Company's net revenue, in turn, in the 2nd quarter of 2022, presented an increase of 35.4% when compared to the same quarter of 2021, thus showing the maintenance of a gradual and consistent recovery in volumes.

The Company continues adopting measures to increase the revenue obtained from new projects, reduce its internal operational costs and improve the margin and cash generation, through constant price negotiations with customers to pass on cost increases (labor, raw material, etc.), following the Company's restructuring process, as well as facing the crisis that started in March 2020 due to the COVID-19 pandemic.

According to official data from ANFAVEA, vehicle production in 2022 points to an increase of 4.1%.

Additionally, Management believes that the new projects that have been started over the last few quarters, added to the projects still under development and that should start production in the coming months, will allow the Company to reverse the quarterly losses. This trend can already be seen by the growing operating profit, obtained mainly by absorbing fixed costs, due to its high degree of operating leverage.

The Company's management is in the process of reviewing the projections, considering new projects and oscillation of volumes in view of the current scenario.

### Impacts of COVID-19 (Coronavirus) on the Company's business

The year 2021 consolidated the beginning of a recovery movement in the Brazilian vehicle market, after the global crisis caused by the effects of COVID-19. In view of this potential market recovery, the Company has already adopted some measures to make its production capacity more flexible and to resume production, among which we highlight the following:

- Resumption of the full workday;
- Flexibilization of the home office regime;
- Resumption of visits by third parties to the company's facilities, by prior arrangement and following safety protocols;
- Intensification of the hygiene and health protocols to guarantee the health of all the Company's employees, customers, and partners.

Despite the demobilization of the Crisis Committee implemented at the beginning of the pandemic, the committee can be activated immediately, in case of need. The Company continues to monitor the situation, always ready to intervene, in case the pandemic situation worsens.

### Impacts of the conflict and sanctions related to Ukraine, Russia and/or Belarus on the Company's business

On February 24, 2022, Russia launched a full-scale military invasion against Ukraine, one of its neighbors to the southwest, marking a sharp escalation to a conflict that began in 2014. In return, Western Countries and others began imposing limited sanctions on Russia when it recognized the independence of the Donbas region. As the attacks began on February 24, many additional countries began imposing sanctions aimed at crippling the Russian economy. The sanctions were broad, targeting individuals, banks, businesses, currency exchanges, bank transfers, exports, and imports.

As a result, the global economy was affected by the conflict, especially in the grain and natural gas sectors. So far, the impact of the conflict is minimal since its main clients and suppliers operate in the domestic market.

Despite all the worldwide repercussion and the general negative impacts on several businesses, up to the present moment the war has not brought representative consequences to the Brazilian automotive sector. Management has been systematically following up on these impacts and has been monitoring the potential impacts on the financial statements and is prepared to adopt punctual measures, if necessary.

### Corporate and Financial Restructuring

At the Extraordinary General Meeting, held on December 13, 2018, the final plan to restructure the Company's debt was approved by unanimous vote of the shareholders present, which, in general terms, involves the assignment of approximately 90% of Plascar's existing debt by the Company's main creditors to the current parent company "Pádua IV Participações S.A.".

On January 31, 2019, according to the Notice to Shareholders and Material Fact disclosed to the market, the Company's capital increase took place with payment through the use of credits held against Plascar Ltda., by private subscription, in the amount of R\$ 449,483, through the issuance of 7,455,251 common shares at a unit issue price of R\$ 60.29 per common share. After the Capital Increase, the Company's capital stock, previously amounting to R\$ 481,972, divided into 4,970,167 common shares, became R\$ 931,455, divided into 12,425,418 common shares.

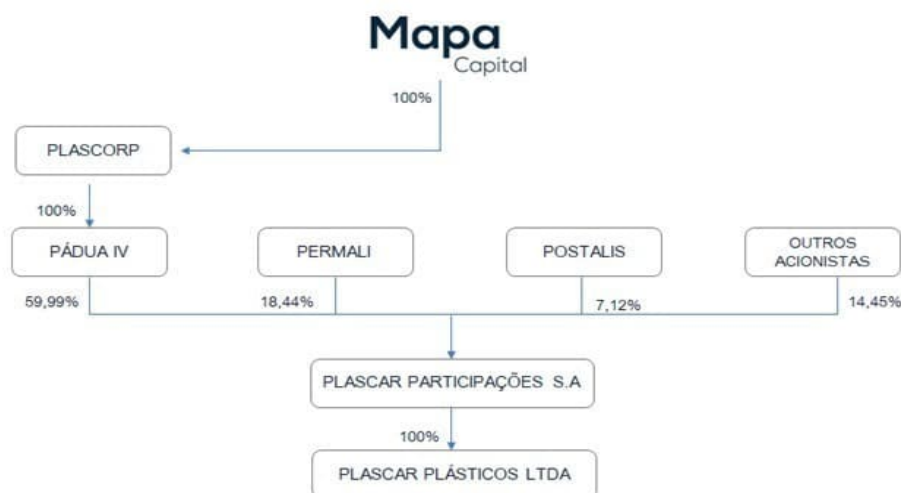

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes for Quarterly Information - ITR, Individual and Consolidated, for the quarter ended on June 30, 2022 (In thousands of Reais, except when otherwise indicated)

With the completion of the Company's financial restructuring on January 31, 2019, the Company's shareholders' equity and current liabilities were positively impacted by R\$ 449,483, resulting from capital increase.

Corporate Structure below:

## 2. Summary of main accounting policies and presentation of quarterly information – ITR

The Company presents the individual and consolidated Quarterly Information in accordance with CPC 21 (R1) - Interim Financial Statements, issued by the CPC - Accounting Pronouncements Committee and IAS 34 - Interim Financial Reporting, issued by the IASB - International Accounting Standards Board, applicable to the preparation of Quarterly Information (ITR), and presented in accordance with the standards established by the CVM - Brazilian Securities Commission.

According to the Circular Letter CVM/SNC/SEP No. 03/2011, the Company chose to present the explanatory notes in this quarterly information in summarized form in cases of redundancy in relation to what is presented in the annual statements. In these cases, the location of the full explanatory note in the annual statement is indicated, to avoid prejudice to the understanding of the financial position and performance of the Company during the interim period. Accordingly, this quarterly information should be read in conjunction with the annual financial statements for the year ending December 31, 2021.

The basis of preparation and accounting policies are the same as those used in the annual financial statements for fiscal year 2021. Therefore, the corresponding information should be read in note 2 of those financial statements.

The consolidated interim financial information includes the financial statements of Plascar Participações Industriais S.A and its subsidiary detailed below:

	Direct participation	
	30/06/2022	31/12/2021
Plascar Indústria de Componentes Plásticos Ltda. (Plascar Ltda.)	100%	100%

### 3. Critical accounting estimates and judgments

Accounting estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Based on assumptions, the Company makes estimates concerning the future. By definition, the accounting estimates will rarely equal the respective actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the relevant amounts of assets and liabilities within the next fiscal year are contemplated below:

#### (a) Income tax, social contribution, and other taxes

The Company is subject to income tax in all countries in which it operates. Significant judgment is required to determine the provision for income taxes in these countries.

In many operations, the ultimate tax determination is uncertain. The Company also recognizes provisions for situations in which it is probable that additional amounts of tax will be due.

Where the ultimate outcome of these matters is different from the amounts initially estimated and recorded, these differences affect current and deferred tax assets and liabilities in the period in which the ultimate value is determined.

#### (b) *Deferred taxes*

Deferred tax is generated by temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts. Deferred tax liabilities are recognized for all temporary tax differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction other than a business combination and, at the date of the transaction, does not affect the accounting profit or tax profit or loss; and
- On temporary tax differences related to investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.
- Deferred tax assets are recognized for all deductible temporary differences and unused tax credits and losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be realized, and unused tax credits and losses can be utilized, except:
- Deferred tax assets are recognized for all deductible temporary differences and unused tax credits and losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be realized, and unused tax credits and losses can be utilized, except
- On deductible temporary differences associated with investments in subsidiaries, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the near future and taxable profit is available against which the temporary differences can be utilized.

#### (c) *Impairment of non-financial assets*

Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized when the asset's carrying amount exceeds its recoverable amount, which represents the greater of an asset's fair value less costs to sell and its value in use. For impairment assessment purposes, assets are grouped at the lowest levels for which there are separately identifiable cash flows (Cash Generating Units (CGUs) as shown in Note 13.

4. Financial risk management

4.1. Financial risk factors

The Company's activities expose it to various financial risks: market risk (including currency risk and fair value risk associated with the interest rate), credit risk and liquidity risk. The Company's global risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company's treasury identifies, assesses, and protects the Company against possible financial risks in cooperation with the Company's operating units.

a) *Market risk*

i) *Cambial Risk*

The Company operates internationally and is exposed to foreign exchange risk arising from the exposure to certain currencies, basically in relation to the U.S. dollar. The foreign exchange risk arises from commercial operations, assets and liabilities.

At June 30, 2022 and December 31, 2021, the Company presents assets and liabilities in foreign currency arising from import, export and loan transactions with related parties in the amounts shown below:

	Consolidated	
	06/30/2022	12/31/2021
Accounts receivable from customers (Note 7)	7,916	9,264
Suppliers (Note 16)	(861)	(1,298)
Net exposure	<u>7,055</u>	<u>7,966</u>

ii) *Cash flow or fair value risk associated with interest rate*

The Company does not have significant assets that bear interest.

The Company's interest rate risk arises from loans and financing. Variable rate loans expose the Company to cash flow interest rate risk. Fixed rate loans expose the Company to fair value risk associated with the interest rate.

The table below shows the sensitivity to a possible change in interest rates, keeping all other variables constant, in the Company's profit before taxation (it is affected by the impact of loans payable subject to variable rates).

Financial liability	Impact on income for the period (1)		
	Scenario I Likely	Scenario II +25%	Scenario III +50%
CDI	13.25%	16.56%	19.88%
Loans and financing	(18,383)	(21,789)	(25,194)

(1) Refers to the hypothetical interest rate scenario to be incurred for the next 12 months or until the contract expiration date, whichever is lower.

In the sensitivity analysis, the interest rate is based on the rates currently practiced in the market environment.

Sensitivity analyzes were prepared based on the amount of net debt and the ratio of fixed interest rates to variable interest rates on debt as of June 30, 2022.

Management's Explanatory Notes for Quarterly Information - ITR, Individual and Consolidated, for the quarter ended on June 30, 2022 (In thousands of Reais, except when otherwise indicated)

### b) Credit risk

Credit risk is managed on a corporate basis. Credit risk arises from credit exposures to original equipment ("OEM") and replacement/dealership ("DSH") customers, including outstanding accounts receivable and repurchase agreements. For banks and other financial institutions, only bonds from top-tier entities are accepted. The individual risk limits are determined based on internal or external classifications in accordance with the limits determined by the Board of Directors. The use of credit limits is regularly monitored.

The possibility of the Company and its subsidiary incurring losses due to financial problems with its OEM customers is reduced due to the profile of these customers (vehicle manufacturers and other companies operating worldwide). As of June 30, 2022, and December 31, 2021, the Company and its subsidiary did not have significant balances receivable from DSH category customers.

No credit limit was exceeded during the period, and Management does not expect any loss arising from default by these counterparties more than the amount already provisioned.

### c) Liquidity risk

Cash flow forecasting is performed in the Company's operating entities and aggregated by the Finance department. This department monitors the continuous forecasting of the Company's liquidity requirements to ensure that it has sufficient cash to meet operational needs. This forecast considers the Company's debt financing plans, compliance with covenants, meeting internal balance sheet quotient targets and, if applicable, external or legal regulatory requirements - for example, currency restrictions.

The Treasury invests any excess cash in interest-bearing bank accounts, time deposits, short-term deposits, and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to meet the forecasts. As of June 30, 2022, the Company maintained short-term funds in the amount of R\$ 3,398, which are expected to readily generate cash inflows to manage liquidity risk.

The following table analyzes the Company's financial liabilities by maturity ranges corresponding to the remaining period between the balance sheet date and the contractual maturity date. The amounts disclosed in the table are the contracted discounted cash flows and represent the expected actual (undiscounted) disbursement flows, disregarding any requirements of banks for early maturity.

### Hierarchy

The classification of financial assets and liabilities at amortized cost or at fair value through profit or loss is based on the business model and the cash flow characteristics expected by the Company for each instrument.

The fair value of a security corresponds to its maturity value (redemption value) brought to present value by the discount factor (referring to the security's maturity date) obtained from the market yield curve in reais. The three levels of the fair value hierarchy are:

- Level 1: prices quoted in an active market for identical instruments;
- Level 2: observable information other than quoted prices in an active market that are observable for the asset or liability, directly (such as prices) or indirectly (derived from prices); and
- Nível 3: instruments whose relevant factors are not observable market data.

### 6. Cash and cash equivalents

	Controller		Consolidated	
	06/30/2022	12/31/2021	06/30/2022	12/31/2021
Cash and banks	5,350	7,384	8,330	10,092
financial investments	-	-	3,398	2,395
	<u>5,350</u>	<u>7,384</u>	<u>11,728</u>	<u>12,487</u>

Banks and available earn interest at floating rates based on daily short-term bank deposit rates. The funds are used depending on the Company's immediate cash needs.

### 7. Accounts receivable from customers

	Consolidated	
	06/30/2022	12/31/2021

(1) Credit Exclusion of ICMS from the PIS/COFINS calculation base - Accounting record final and unappealable.

The Company informs that, in 2010, it filed a Writ of Mandamus seeking the exclusion of ICMS from the PIS and COFINS tax bases. In September 2017, the Company obtained a favorable decision in a lower court and, in October 2019, obtained a new favorable decision on appeal (STF). In the same act, the process became final and unappealable. In view of this, the Company started a procedure to collect the amounts unduly paid as of 2005 and claim their respective reimbursement. The Company has calculated and reliably measured the respective amounts. On August 19, 2019, the Company obtained a favorable ruling to use the ICMS highlighted on the invoices to calculate the credit. In the fourth quarter of 2019, based on the opinion and report prepared by its advisors, the Company recorded the amount of R\$ 179,069 under the heading of taxes recoverable in the balance sheet to offset against current taxes administered by the Federal Revenue Service in future periods. The principal amount of the credits, net of the lawyers' success fees, was recognized as other operating income and the monetary restatement amount was recognized under the financial income heading in the income statement for the year.

The homologation and qualification of R\$ 123,396 related to the part of the referred credit with the Brazilian Federal Revenue Service for future tax compensation occurred on January 3, 2020, and the remaining credit amounting to R\$ 55,673 will be subject to analysis by the Brazilian Federal Revenue Service for future refund or compensation of taxes previously paid in installments.

In the 3rd quarter of 2021 the Company revisited its financial projections for the years 2022 to 2024 and, considering the initial balance of R\$ 179,069, less the compensations made until the 3rd quarter of 2021 of R\$ 63,469 and adding the monthly monetary adjustment of the accumulated credit of R\$ 27,694, the Company concluded that it will not be possible to compensate 100% of the current balance during the 5-year statute of limitations, starting in October 2019 and ending in October 2024. Thus, an impairment provision in the amount of R\$ 20,629 was recorded in the result for the year. The Company has compensated up to June 30, 2022 the amount of R\$ 86,786 and expects to compensate all credits within the statute of limitations. Management revisited the projections for the second quarter of 2022 and there was no need to supplement the provision.

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes for Quarterly Information - ITR, Individual and Consolidated, for the quarter ended on June 30, 2022 (In thousands of Reais, except when otherwise indicated)

- (1) Refers to deferred taxes calculated on the cost attributed to property, plant and equipment arising from the accounting of its fair value in the first-time adoption of CPC 27 (IAS 16).
- (2) Refers to deferred taxes calculated on the difference in depreciation of property, plant and equipment generated after review of the economic useful life of the assets. Until December 31, 2010, the Company, as permitted by tax legislation, also considered for tax purposes the depreciation calculated based on the new economic useful lives of the assets. Since September 2011, the Company has used the depreciation calculated based on the useful life allowed by tax legislation for tax purposes and, consequently, recognized the corresponding deferred tax effects.

The Company has tax loss and negative social contribution basis balances of R\$ 60,280 and R\$ 71,282, respectively at June 30, 2022 (R\$ 59,374 and R\$ 70,376 at December 31, 2021, respectively), the subsidiary Plascar Ltda. has tax loss and negative social contribution basis balances of R\$ 988,407 and R\$ 983,351, respectively at June 30, 2022 (R\$ 960,587 and R\$ 955,531 at December 31, 2021, respectively) on which deferred tax assets have not been recognized, as determined by CVM Instruction 371, since the Company does not expect to generate future taxable income.

(2) Refers to advances to suppliers for the acquisition of machinery and equipment to expand the operating and production capacity of the Company's industrial units, made between 2010 and 2011 for Sandretto and financed with BNDES through the FINAME/PSI program in the amount of R\$ 44,084. Of the amount recorded at December 31, 2018 and 2019, R\$ 36,548 was advanced by financial institutions and R\$ 7,536 advanced to the supplier with own funds. The Company, after detailed analysis with its legal advisors, decided to record a loss on the total amount outstanding, in the total amount of R\$ 44,084 still in fiscal year 2018. The Company has adopted all possible legal measures and will continue to pursue its rights by legal means. However, the Company considers unlikely the possibility of receiving these assets in the short term, notwithstanding the lawsuit is still in progress. In 2019 the Company recorded impairment of R\$ 17,955 referring to machinery and equipment identified as non-operational in the year. The Company is surveying with its technical staff the necessary investments and feasibility to adapt part of this equipment to production.

In June 2021, the Company was notified by the Federal Revenue Service, through a tax assessment notice and the imposition of a fine, which required the collection of social security contributions and third-party contributions on amounts paid as profit (PLR) to employees in 2017, in noncompliance with Law 10,101/2000. The corrected amount of the tax assessment notice at December 31, 2021 is R\$ 5,081 and, after exhausting the discussion at the administrative level, the Company opted to settle the liability by joining the tax transaction program authorized by PGFN ordinance 11/2021, in installments and with discounts to be applied after ratification of the transaction. The Company recorded a provision for this amount, which is duly entered in the line item "Social charges" against Other operating expenses (original amount) and financial expenses (charges).

#### b) Legal proceedings - amounts involved and accounting provision criteria for cases of probable loss

The Company is a party to several labor and social security, civil and tax lawsuits that are currently in progress. The criterion adopted by the Company for classification of the risk of loss is estimated as "remote", "possible" and "probable", where "remote" indicates minimum risk of loss, "possible" indicates moderate risk of loss, and "probable" indicates high risk of loss. The external legal advisors, with the assistance of the Company's legal department, are responsible for analyzing in detail each new or ongoing lawsuit, classifying them according to their best estimate of results.

These risk classifications are assessed on a monthly basis, and may be changed whenever the legal counsel's understanding indicates the need to do so. Besides this, all the lawsuits also receive monthly monetary updating, in accordance with the legal indexes adopted by the courts, in order to reflect as accurately as possible the current economic situation of each lawsuit.

For all cases in which the external and internal legal advisors indicate the risk of loss as "probable", the Company constitutes an individual provision in an amount sufficient to face the estimated value of this loss, which is duly calculated and ascertained through a legal accountant (in the case of the court) or an accounting expert (in the case of the Company), based on the condemnatory sentences and/or any other decisions coming from higher courts (appeals) that are issued by the courts and that indicate, with no margin of doubt, that the Company is obliged to make the payment in a short term due to the advanced stage of the process. In addition, the Company adopts the policy of making a monthly provision for labor lawsuits classified as "possible" risk of loss, for which the Company estimates that judicial agreements will be reached for settlement and closure of the claims before the execution phase begins. After analysis made by the legal advisors, the Company reviewed the percentages of historical agreements made and decided to supplement these provisions by R\$ 3,142. The impacts of this revision were recorded in their entirety in Q3 2020.

## PLASCAR PARTICIPAÇÕES INDUSTRIAIS S.A.

Management's Explanatory Notes for Quarterly Information - ITR, Individual and Consolidated, for the quarter ended on June 30, 2022 (In thousands of Reais, except when otherwise indicated)

Considering the lawsuits with risk of loss, the Company has a total provision recorded as indicated below:

	Consolidated	
	06/30/2022	12/31/2021
Social security and labor provisions	6,200	6,502
	<u>6,200</u>	<u>6,502</u>

The movement in the provision for lawsuits in the 1st quarter of 2022 is as follows:

### *Social Security and Labor*

	June 30, 2022			Final Balance
	Opening Balance	Additions	Payments	
Labor	6,502	3,106	(3,408)	6,200
	<u>6,502</u>	<u>3,106</u>	<u>(3,408)</u>	<u>6,200</u>

### c) Estimate of "possible" losses, not provisioned in the balance sheet

For the Company's other lawsuits, which have their risk of loss classified by external and internal legal advisors as "possible" or "remote", no accounting provision is recorded. Despite this, the Company recognizes the importance of informing the amounts involved in these processes, as a way of providing the market with sufficient knowledge and information about all the actions in which the Company is a party. For new shares, the value informed by the Company takes into account the value given to the case (initial value). As the process progresses, the legal advisors determine the amounts involved in each case with greater criteria, valuing each one of them more precisely in terms of the amounts actually involved, as well as their effective risk of loss.

Considering the processes with a risk of "possible" loss, not provisioned, the Company informs that the amounts involved are thus constituted:

	Consolidated	
	06/30/2022	12/31/2021
Tributary (1)	4,618	4,444
Labor	12,781	10,971
Civil	5,318	4,185
	<u>22,717</u>	<u>19,600</u>

(1) It is mainly due to tax debts which are under negotiation with the Attorney General's Office.

### d) Relevant contingent assets

Plascar Ltda. is currently a party to two lawsuits considered to be relevant, against FUNRURAL and ELETROBRÁS, for amounts of R\$ 8,585 and R\$ 19,249, respectively.

(i) The lawsuit against ELETROBRÁS, whose sentence was favorable to the Company, is at an advanced stage, and the Company had already started the process of provisional execution of the sentence, requiring the payment of the amount due. In July 2020, however, through its external advisors, the Company became aware of a supposed assignment of rights, which would have taken place in May 2003, whereby the ownership and the economic benefits arising from this process would be assigned to third parties. Having not identified internally elements that would confirm such an assignment of rights, the Company manifested itself in the records, requesting more information on the subject and, at this moment, is awaiting a manifestation from the court.

Management's Explanatory Notes for Quarterly Information - ITR, Individual and Consolidated, for the quarter ended on June 30, 2022 (In thousands of Reais, except when otherwise indicated)

(ii) The lawsuit against FUNRURAL was processed and judged on September 4, 2001, and Plascar was granted the right to receive the amount of R\$ 2,237 (Note 9). This amount, however, was questioned by the Company in relation to its monetary restatement, which was not considered by the court. A decision on the monetary restatement is still pending and, consequently, the correct amount to be settled in favor of the Company, which the legal advisors estimate to be R\$ 8,585.

### 21. Equity

#### a) Capital

As of June 30, 2022, and December 31, 2021 the Company's capital stock is R\$ 931,455, divided into 12,425,418 registered common shares, with no par value.

Shareholders	06/30/2022 and 12/31/2021	
	Number of shares	Participation
Pádua IV Participações	7,454,491	60.0%
Permalí do Brasil	2,290,953	18.4%
Postalís	884,712	7.1%
Other Shareholders	1,795,262	14.5%
	<u>12,425,418</u>	<u>100%</u>

The issue price of the shares was set, without unjustified dilution for the Company's current shareholders, considering the methodologies allowed by article 170, paragraph 1, of the Brazilian Corporation Law, in view of the Company's financial situation at that time, with high indebtedness and negative net equity.

#### *Subscription Bonus*

The Company issued, in favor and as an additional benefit to the subscribers of the Capital Increase shares, upon the achievement of Plascar Ltda.'s EBITDA targets in 2020, 2021 or 2022, 7,455,251 subscription warrants, in a single series and in book-entry registered form, with one subscription bonus for each Capital Increase share subscribed.

The grant to its holders, in aggregate, grants the right to subscribe for shares of the Company representing 5% of the Company's capital after the issuance of such shares. The subscription price for 1 share issued as a result of the exercise of the warrants will be R\$ 0.01 "Exercise Price". The subscription of the shares resulting from the exercise of the warrants will be made privately, upon exercise of the Subscription Right, and the payment of the subscribed shares shall be made through cash payment of the Exercise Price, in local currency, upon subscription of such shares.

### b) Reserves

#### *Equity valuation adjustments*

Consisting of the accounting record of the realization of the cost attributed to the fixed assets and respective taxes. This item also records the impacts of the change in the parent company's interest in the subsidiary from 99.89% to 100% after the financial restructuring that took place on January 31, 2019.

### c) Remuneration to shareholders - distribution of dividends

According to the Company's Bylaws, shareholders are entitled to receive a minimum annual dividend of 25% of the net income for the year, adjusted in accordance with articles 189 and 202 of Law 6,404/76. Due to the losses calculated, no distribution of dividends was made on December 31, 2021 and 2020.

## 22. Earnings per share

The basic calculation of earnings or loss per share is made by dividing the net profit or loss for the year, attributed to holders of common shares of the parent company, by the weighted average number of common shares available during the year.

Diluted earnings or loss per share is calculated by dividing the net profit or loss attributable to holders of the parent's common shares by the weighted average number of common shares available during the year, plus the weighted average number of common shares that would be issued on conversion, of all potential common shares diluted in common shares.

The table below presents the results and shares data used in the calculation of profit or loss, basic and diluted per share for the period ended June 30, 2022 and 2021 (in thousands, except amounts per share):

On overdue amounts, the Company records a 20% fine in addition to correction by the indices provided for by legislation.

#### Special Tax Regularization Program (PERT)

Plascar Ltda. joined the PERT program on August 29, 2017. The balance of the taxes due until April 2017, under the Attorney General's Office, was paid in 120 installments, with the amount of the installments in the first 12 months corresponding to 0.4% of the debt, 0.5% in the second year, 0.6% in the third year, and the remaining balance in 84 installments. The adjustment index for the installments is the Selic rate.

Additionally, MP 783/17 was converted into Law 13,496/17 on October 25, 2017, including a new modality of installment payment, where there is the possibility of using tax losses and negative basis of CSLL to abate the consolidated debt under the Brazilian IRS.

#### PGFN Extraordinary Transaction

On May 30, 2022 the Company adhered to the Extraordinary Transaction under the PGFN to settle the outstanding balance previously paid in installments under PERT. The total amount involved is R\$ 47,749 in 84 installments.

	<u>55,247</u>	<u>110,133</u>	<u>44,521</u>	<u>91,109</u>

#### Additional benefits

In addition to the usual benefits provided for by labor legislation, the Company and its subsidiary have the practice of granting their employees additional benefits contracted from third parties, such as: medical assistance, collective transportation, food and day care assistance.

#### Profit Sharing Plan

The Company and its subsidiary have complementary variable compensation plans that consider meeting the established goals:

- (i) (i) Profit sharing plan (PPR): the Company pays its employees through profit sharing according to the collective agreement established between the Company, the employees' committee and the union of the category, which establishes targets that are measured and disclosed monthly. This plan aims to stimulate development and productivity, providing opportunities for financial gains and conditions for effective participation in the Company's results.
- (ii) Additional profit sharing bonus plan (short-term PPR): the Company also provides a differentiated amount of salary bonus to the Company's managers and directors. The profit sharing due to the employees occupying these functions is based on performance (individual and the Company), in accordance with pre-established goals.

### 28. Insurance

The Company and its subsidiary maintain insurance policies of various natures, contracted with the main insurance companies in the country. These policies were defined according to the group's program and take into consideration the nature and degree of risk involved.

In the semester ended June 30, 2022, the insurance coverage against operational risks combined with loss of profits was R\$ 750,000 (R\$ 629,300 in December 31, 2021), and R\$ 10,000 (R\$ 10,000 in December 31, 2021) for civil liability.

The Company does not anticipate having any difficulties in renewing any of the insurance policies and believes that the coverage is reasonable in terms of value and compatible with industry standards in Brazil.

### 29. Subsequent Events

On July 19, 2022 the issue of Commercial Notes in the total amount of R\$ 30,000 was concluded, destined for working capital, with an amortization period of 36 months and monthly payments starting in December 2022.
