History

The Company began its activities in October 1963 in Jundiaí, São Paulo State, manufacturing rubber products. From 1973 it began to operate in the automotive market, and in the mid-80s, after several mergers, the Company enhanced its manufacturing activities through a growth and modernization program, and became a leader in the market of plastic parts for the automotive industry.

Corporate Structure

After the completion of the Company's financial restructuring on January 31, 2019, Plascar S.A.'s controlling interest is now held by Padua IV S.A., with 59.99% interest in its capital; Permali do Brasil Indústria e Comércio Ltda. holds 18.44%, Postalis Instituto de Seguridade Social dos Correios e Telégrafos holds 7.12%, and other individual shareholders own 14.45%.

Operating Performance

According to data from the Brazilian Association of Motor Vehicle Manufacturers (ANFAVEA), in the nine months period of 2019, there was an increase of 2.9% over the same period in 2018. Increase in sales, there was a 14.7% increase in sales compared with the same period last year, reaching a gross margin of 4%.

| SOURCE: ANFAVEA – BRAZIL | | | | | | |
|------------------------------|--------------------|-------|------|--|--|--|
| AUTOMOTIVE INDUSTRY SCENARIO | 9M'18 9M'19 DIF. % | | | | | |
| VEHICLE PRODUCTION | 2,194 | 2,258 | 2.9% | | | |
| VEHICLE SALES | 1,846 | 2,030 | 9.9% | | | |

Vehicle production goes sideways to less than 3 million in 2019

Anfavea projects growth of 2%, and the high domestic market does not compensate for the fall in exports.

The deep and continuous fall in exports, from 35% accumulated from January to September, has already compromised the performance of vehicle factories. At the same time, the less than 10% increase in domestic sales was not enough to offset the external retraction. In the first nine months of 2019, 2.26 million units were produced, which represents a slight increase of 2.9% over the same period of 2018. With this, Anfavea, the association of manufacturers, started to work with the projection that Production will go sideways in 2019, with less than 3 million vehicles assembled, standing at 2.94 million, a flat 2% increase over last year.

"Almost all the loss of production this year will be due to the drop in exports to Argentina, but even so we will close the year with an important number," explained Luiz Carlos Moraes, president of Anfavea.

At the beginning of this year, Anfavea estimated a 9% increase in national vehicle production, which should overcome the barrier of 3 million units produced (forecast was 3.14 million) for the first time since 2014. But the retraction exports was much stronger than expected and this month the manufacturers' association revised the projection to 2.94 million, "which is also an important figure with growth; small, but it is ", points out Moraes.

In the new estimate presented by Anfavea, revised exports from 590 thousand to 420 thousand represent the biggest loss of production this year, of 170 thousand units - practically the same number of the projected retraction of purchases of Brazilian vehicles in Argentina, estimated at minus 175 thousand.

According to the entity, because of the scenario of economic stagnation in Brazil, the domestic market is expected to buy 30,000 fewer vehicles than was initially expected. Adding the internal and external setbacks, factories are expected to produce 200,000 fewer units than Anfavea projected in early 2019.

According to Moraes, even with the stagnation of production, the employment level of vehicle factories should not change in the coming months, "tends to be stable". There has already been a 3.4% reduction, or 4,542 vacancies, in the number of industry workers between September 2018 and 2019, which closed with 127,938 people on the payroll. The small reduction of 215 people in the automakers' staff between August and September is entirely due to the process of closing Ford's plant in São Bernardo do Campo and the closing of Toyota's third production shift in Sorocaba (SP).

Vehicle inventories in the yards of factories and dealerships remained almost stable between August and September, growing slightly by 1.57% from 343.2 thousand to 348.6 thousand units waiting for buyers, representing 45 days of sales, a slightly above the level considered ideal by the manufacturers. "There have been many launches in

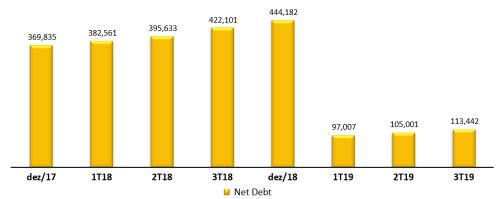

recent months, which usually increases the volume of inventories a little," explains Moraes.

Company Restructuring

On December 13, 2018, the Company's debt restructuring was approved pursuant to the Special General Meeting.

On January 31, 2019, pursuant to the Notice to Shareholders and the Material News Release disclosed to the market, there was an increase in capital paid in by using receivables from Plascar Ltda., through private subscription, in the amount of R\$449,483, through issue of 7,455,251 common shares by Pádua IV S.A., thus concluding the Company's restructuring process.

Evolution of Net Debt (in thousands of R\$)

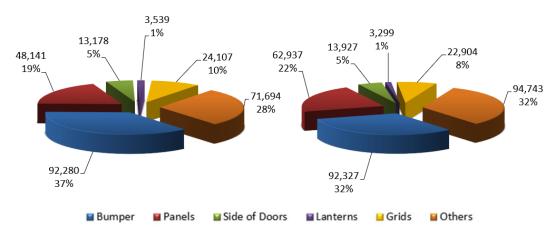

The increase in debt in 3Q19 compared to 2Q19 is due to the new working capital debt.

Composition of Net Revenue in 3rd quarter of 2019 - R\$ 290,137 mil

Gross P&L vs. Gross Margin %

In 9M'2019 gross margin was 4.0% against 0.8% in 2018. In the 3rd Quarter of 2019 gross margin was 12.7% against 1.7% in 2018.

EBITDA in R\$ vs. EBITDA%

EBITDA in 9M'2019 totaled negative R \$ 6,781 thousand (2.3%) (positive R \$ 5,510 thousand (4.9%) in the third quarter of 2019), against negative R \$ 16,763 (6.6%) in 2018 (Negative R \$ 6,535 (7.4%) in the third quarter of 2018).

Net loss totaled R \$ 126,681 thousand in 9M'2019 (R \$ 24,068 in the third quarter of 2019), in the same period of 2018 totaled loss of R \$ 141,457 (R \$ 65,781 in the third quarter of 2018)

Human Resources

Despite the country's economic adversities and the necessary reduction in its headcount, the Company continued to invest in the development of its employees, totaling approximately 64.58 hours of education and training per employee (in the past 12 months), focusing on SENAI courses, trainee programs, in addition to internal training for technical and operational development.

At September 30, 2019, the Company had 1,806 employees (1,798 in 2018).

Subsequent Events

Tax Matter: Process in judgment in the process of excluding ICMS from the assessment base of PIS/COFINS.

The Company informs that, in 2010, issued the Wrid of Mandamus aiming to exclude ICMS from the assessment base of PIS and COFINS. In September 2017, the Company adopted a favorable decision at first instance and, in October 2019, received a new decision in favor in the appellate court (STF). In the same act, occurred the process in judgment. By these means, the Company can initiate a procedure for the collection of amounts unduly paid between 2005 and claim your compensation. The Company has already started working to calculate and measure these amounts reliably. At the end of this stage, the Company will adopt the measures for approval and qualification of the credit referred to The Brazilian Federal Revenue Office and the required accounting recording, measurement and structuring of tax benefits that are attributed to tax events predicted in terms of future tax offsetting. All these steps and clarifications must occur throughout the 4th Quarter and must be reported to the market at the time of publication of the annual balance sheet.
